BIO-Nesting

&

The Hemp
Hideout™
with BIO-Nesting™

Product Description - BIO-Nesting

NuHemp BIO-Nesting is made from the inner core and outer fibres of the hemp plant stem which is grown and processed entirely in Canada. It is not bleached and no chemicals or pesticides are added at any stage of its growth thus producing a completely green product which is

fully recyclable into a useful organic compost.

For good health and well-being, small animals need a hygienic, warm, soft and comfortable habitat/bed which will absorb moisture and ammonia, giving a clean, dust-free environment. BIO-Nesting is anti-microbial, is twice as absorbant as traditional bedding materials such as wood chips, fibre or pulp and is virtually dust-free.

Product Description - The Hemp Hideout

The Hemp Hideout with BIO-Nesting is a natural nesting box that fits inside virtually any size of small pet home, giving them a 'home within a home' to provide a natural sense of security. The outside of the Hideout has the appearance of a house and is stenciled like a colouring book so that it can be customized with non-toxic markers.

The Hemp Hideout is an ideal small animal starter kit that comes with an ample supply of BIO-Nesting. This nesting is biodegradable, absorbs moisture and is totally safe, just like the Hideout itself - even if the new resident decides to customize it by gnawing on it!

Product Benefits & USP's:

Bio-Nesting

- All Natural and Biodegradable
- Anti-microbial and virtually dust-free
- Absorbs twice as much as conventional bedding materials
- Closely resembles the animal's natural habitat

The Hemp Hideout

- Made from recycled materials and is biodegradable
- Completely customizable through colouring
- Works as a small pet home or carrier

Directions

BIO-Nesting

Remove any previous bedding material and clean cage thoroughly. Spread a fresh layer (1-3 inches deep) of BIO-Nesting on the cage bottom. Check daily for fecal matter and moist spots. Empty weekly or as often as needed according to your pet's needs. Discard as you would any compostable material...even add to your garden! Readily composts into a high-grade organic material.

The Hemp Hideout

For use as a small animal carrier simply fold up the attached cardboard handle while snuring that all openings are covered with the pre-installed. For use as a small pet habitat punch out the pre-installed cardboard flaps and ensure top flap is tucked in. Colour with non-toxic markers prior to placing in the pet's cage.
