

369 NuHEMP™

Omega Sauce™/MC

Product Description:

NuHemp Omega Sauce is a balanced, daily dietary supplement topping for our four-legged friends! It is a blend of pure, human-grade natural canola and hemp oils and in the PLUS varieties is fortified with a synergistic blend of nutraceuticals. Each of the five different flavours of Omega Sauce deliver an ideal combination of Essential Fatty Acids (EFA's), necessary for beautiful skin and coat while promoting optimal digestive health. Adding Omega Sauce daily to the diet delivers much-needed nutrients in optimal amounts.

Product Benefits & USP's:

- Made with all-natural, human grade ingredients
- Rich in Essential Fatty Acids (Omega 3, 6, and 9) and Vitamin E
- No chemicals, salt, colour, artificial preservatives or water added
- A naturally potent anti-oxidant
- Supports improved digestion and therefore nutrient absorption
- Promotes skin, coat and joint health
- No animal by-products or animal testing
- PLUS variety to promote joint & hip health

Flavours & Ingredients

Omega Sauce Holistic

Flavours: Peanut Butter Smoothie, Roasted Chicken, Sizzling Bacon, Luscious Liver & Cheese

Ingredients: Pure Canola Oil, Cold Pressed Hemp Seed Oil, Natural Flavouring, Rosemary Extract.

Omega Sauce PLUS - Nutraceutical

Joint, Hip & Digestive

Ingredients: Pure Canola Oil, Cold Pressed Hemp Seed Oil, Methylsulfonylmethane (MSM), Glucosamine HCL, Fructooligosaccharides (FOS), Rosemary Extract.

Directions & Daily Recommended Dosages:

Always shake well before using! Add one tablespoon per 20lbs/9kg of animal body weight per day to wet or dry food and stir. For best results use as a daily dietary supplement.

Specialty Nutrient Information:

Hemp Seed Oil: Expeller-pressed from whole hempseeds. Contains a high concentration of polyunsaturated fats. Contains a well-balanced combination of Omega 3, 6, and GLA. Remains stable for many months at room temperature due to its high anti-oxidant content.

Canola Oil: Canola oil has a well-balanced fatty acid profile. It has the lowest level of saturated fats of all commercially available oils (7%); it has the second highest level of monounsaturates (61%); it is a good source of polyunsaturated omega-3 fatty acid; and, as liquid oil, canola has zero trans fat or cholesterol.

MSM: A naturally occurring form of sulphur compound used by the body to build connective tissue and amino acids.

FOS: A prebiotic fibre for companion and commercial animal feeds to promote a healthy digestive tract. Stimulates the growth of beneficial bacteria in the gastrointestinal tract, which helps strengthen the immune system and reduces susceptibility to pathogenic bacteria.

Glucosamine HCL: A charged sugar molecule that is a key component of the extra cellular matrix of cartilage (grout between the cartilage cells). Enhances the body's ability to manufacture collagen and proteoglycans which are essential for rebuilding joints as well as synovial fluid which lubricates joints.
